

School Improvement Plan 2017-2018

We are in the process of completing our school development planning for 2017-2018 by reviewing and auditing the curriculum and making plans for next year. We would be grateful for your contribution to this process which can be considered alongside the staff, pupils and governors views.

As we have already made you aware, budgets have been decreased and expenditure has been increased which means there is no money left in the budget for any luxuries. Curriculum areas have been limited to only asking for essentials items due to this. With this in mind, we will review all suggestions made but will be limited to essential items only.

Please share your suggestions in the boxes below and return by Wednesday 26th April 2017.

Thank you
